

D-OSTOMY

The D-Ostomy is a novel, patented, D-shaped ostomy designed to be placed near difficult anatomy (*incisions, scars, drains, umbilicus, rolls, folds, second ostomies, etc.*) without overlap. The barrier can be rotated and the straight edge placed adjacent to any anatomical challenge. Because each client is different, our pouches come in all four cardinal directions. This allows the client to place the barrier in any orientation they require.

ITEM NAME	SKU (IDENTIFIER)	HCPCS
D-Ostomy Barrier	FD-8	A4414
D-Ostomy Closed Pouch	BD-8-NGC	A4419
D-Ostomy Closed Pouch	BD-8-EOC	A4419
